Hello Eric, I understand this is a big day for you.

# HAPPY BIRTHDAY!!

I can only sit back and admire all that you have accomplished. Congratulations on another great year. Roger

Roger A. Moore MD  
Immediate Past President,  
American Society of Anesthesiologists

Chair Emeritus,  
Deborah Heart and Lung Center

Dear Roger:

How thoughtful of you to send me birthday greetings for my 99th. If I were Chinese I would be 100 as they number your age as 1 on your birth. I do not qualify because I have not yet learned to squint properly.  
Eric

Hi Eric, Thank you for any help you can give that will ultimately lead to high quality photos of the 12-W!! In regard to numismatics, I am writing again now that my presidency is past and I have a paper that will be published in CNL this summer on a sub group of King George III counterfeit halfpence called the Swollen Jowls. I am putting the final touches on a paper which is a survey of Flip-over-double- stuck New Jerseys. In the wings is a paper on Maris signatures (I acquired some hand written letters and post cards from Maris) as well as a paper on the first known signature of a Higley from Simsbury (Joseph - not John or Samuel) but definitely a Higley tie in. I am also working on a very large counterfeit halfpence family called the Boyish Georges but I have a lot of work to do on that paper. The ultimate project is the Virginia book but this is halted until I have a high quality 12-W image!! BTW, I know a really BIG birthday is come up soon. I wish you an early Happy Birthday!!! Roger

---

**From:** "[REDACTED]" <[REDACTED]>**To:** [REDACTED]**Cc:** [REDACTED]**Sent:** Fri, April 22, 2011 4:13:55 PM**Subject:** Virginia Halfpence Coinage

Dear Roger:

You have written that you have been unable to find an example of Virginia halfpence variety 12 - W and that I wrote about it and imaged it in my published additions to my original Virginia article. I am flooded with other previous research requests and would have to delay you for a long while. I have a packing box full of Virginia coinage material in my basement and will ask my curator to look for a clue. I hope he will be successful as soon as he can get to it. I hope you are thriving because numismatics can cure any health problems if doctors cannot. Eric

Dear Eric, Thank you for looking!! I have a beautiful W reverse from my 10-W (I attached an image for your review) but am stumped on going forward with the book until I can get a obverse 12 image. Perhaps I could use your images if it is acceptable to you? I am not sure of their resolution (positive or negative), but I would like to enlarge to a 6-7 inch x 6-7 inch image. Do you think they will enlarge properly? I would gladly pay your assistant to either have copies made or have it sent out for professional reproduction. Of course if used in the book, you will get full credit. In any case thank you for looking through your archives for me.

My very best regards, Roger

**Subject:** Virginia halfpence

Dear Roger:

You asked to see if I knew who owned a Virginia halfpence variety 12-W. I went through all my files to try to be of help. I do not know.

I do have a group of Virginia negatives. Curiously, we have both positive and negative images of obverse 12. We do not have either a negative or a positive of reverse W which we know is taken from the 12-W coin and our photos seem to be from the 10-W. Perhaps the 12-W coin had such a poor condition reverse that its image was not taken.

We are sure you know all the details of the Norweb coin 10-W. We do have a positive print of both sides of that coin on one sheet of photopaper.

We hope some of this is helpful.

Eric

# **HAPPY BIRTHDAY, ERIC!!!**

I guess you are pretty tired of hearing all the accolades and receiving all the attention, but today it is necessary and deserved. 100 years of excellence in numismatic research is an incredible accomplishment. You may not know it but I collect co-authors on the numismatic papers I write (another eccentricity) and I cherish your name on the Virginia copper paper we wrote. In any case I raise a toast for your next decade of research.

**My very best regards, Roger Moore MD**

Sun, Nov 13, 2011 at 4:25 PM

Hello Eric,

Last night the C4 Donated lots were auctioned off and there was a very special copy of your book "The Early Paper Money of America" in the auction. Ray Williams is a special and giving person for having developed the idea of you signing a copy of your book on your 100th birthday, as a way to support C4 economically. You were a special and giving person to have gone along with the plan. The result of all this demanded that I get the book at any price and I am thrilled to say that I succeeded. My wife has decided that was such a special book, that she would be willing to give it to me as my combined Christmas and Birthday present for the coming year. She is also an angel!!

In any case, your note in your book has now become part of the numismatic history and lore. I am thrilled to be it's caretaker for however long I can!! Thought you would like to know.

My very best regards,  
Roger

---

To: [REDACTED]

Mon, Nov 14, 2011 at 1:42 PM

Dear Roger:

Even though I may be living on borrowed time I do not want to associate with angels as yet. When you describe your wife as an angel for giving you a book I wrote I want to thank her for benefiting C4 and for continuing to stimulate your numismatic and other accomplishments. Only Ray Williams would think of such an idea. Happy Thanksgiving.

Eric.

Dear Eric, I hope this winter is finding you fit and active. I have attached the image of a counterfeit halfpence called the RAT due to the shape of the folds in Britannia's lap looking like a rat. The label on the coin is EPN and I was wondering if this is your coin. If so could you have better images emailed to me, since I am doing a short paper on the small group of these (I think 6 so far) that are known to exist? Could I also get the weight, diameter, and axis of the coin? I was also wondering if you have any history on the Rat family - where did you get your coin? I understand they have all been found in North America which could point their origin to the U.S. I had heard that Ringo had found a few in the Northeastern U.S. a number of years ago but have no confirmation to this. Thank you Roger

Dear Eric, Thank you for your reply. I have attached the plate of the Ringo Rat Counterfeit halfpence which I plan to use in the article. You will note that your coin is labeled with your name. I want to be sure that this is okay with you, as well as the use of your photo. If you can find the coin and get the data on it, that would be a real plus!! As you may know, I have spent a lot of my numismatic time on the cft halfpence lately and it sounds like you most likely have some very interesting coins in your holdings. I need to make the trip to Saint Louis sometime to check them out!! Look forward to hearing from your assistant, though I know you are overwhelmed with projects. Being overwhelmed is actually a good thing!! Roger

Dear Roger:

It is a pleasure to hear from you. I am trying to be active but I have so many projects in process I cannot keep up with them. I was very friendly with Mike Ringo and even have a scrip note from his ancestor of the same name who was mayor of Mexico, Missouri in 1862.

Now the problem. I do not think I have ever tried to list or had listed my counterfeit British farthings or halfpence of non-American origin. I may have about 200 pieces. I have 14 which were given to me by Peck who in 1970 wrote the book on the genuine British coppers in the British Museum collection and who gave his genuine pieces to it when he got cancer. He gave me his counterfeits because I was interested and gave him a tiny bit of help on his book.

The Peck pieces range from very fine to unc. Then I have another group which I may have bought from Ringo in 1992 but I will try to find my check if I need to. Then I have a still unassorted group which Bowers bought for me in England about 1965 from a collector by the name of Hammond after I had my prior large collection stolen in my first residence burglary.  
Eric.

Dear Roger;

Now that I have the image of the RAT counterfeit halfpence my foundation is supposed to own I can permit you to use its image and any data you may have about it in anything you write. Unfortunately it does not seem to be in nicer condition. I am unable to locate it at this time because I plan to combine my three groups of English coined unclassified counterfeit halfpence totaling about 300 pieces and perhaps I can find it..My American coined counterfeit halfpence are well identified because I worked on them rather carefully.

If you want to come to St. Louis sometime to see my English coined counterfeits I will try to assemble them. Are you able to determine their variety by examination or do you have a grouping chart which may enable my curator to do that in advance.

I believe that Schettino and others also did a lot of writing on the subject and would appreciate the citations for my curator to use. .Incidentally the captain of the cruise ship which recently [sunk.in](#) Italy was Schettino.

Eric

Hello Eric, Thank you for your permission. In regard to combining your collections of British Halfpence, I will point out what you are already very well aware of and that is, not all counterfeits with British-like legends and devices are of British origin. Mike Ringo in particular had pointed out a number of varieties that were most likely made in America. Byron Weston wrote a short paper about his discussions with Ringo, which provides a number of images of counterfeits thought to be of American origin. It turns out the the Ringo Rat, while not being mentioned in the paper, has only been found in North America (all 6 examples) and none in British accumulations. Though this is indirect evidence, it does point to an American origin for these coins.

The Ringo Rat group has one and only one Variety and therefore cannot actually be called a Family. It is something that has been given the appropriate name of an Orphan, without a true Family connection - as yet. My paper on these coins will be

short and serve primarily as a survey of known examples of this variety. I would love to come to St. Louis but I am pretty overwhelmed at work. I plan to retire from full time work in two years and be able to devote myself to coins more deeply. There are some 10,000 varieties of cft halfpence and there is no reference book available at this time. I am slowly writing up Families and a paper on the group of 1773 and 1774 Boyish George counterfeit halfpence will be coming out in the next CNL. You will note previous papers I have written on the Swollen Jowl and the Lanky Letter Families. Many other papers are in preparation but your curator would have a huge learning curve to get up to speed on these coins. Clem is no longer actively collecting these coins but I am an active buyer of his coins, as I work my way through the Families. Great fun and new discoveries around every corner!!

My very best, Roger

Dear Ringo Rat Roger:

I do not think you are doing yourself justice to speculate that any counterfeit British halfpence found in America is American produced until you have some evidence that an American mint existed somewhere during an appropriate period. This was proven as to the finding of Machins Mills operations.. Examples of such counterfeits as have not been found in England might have been produced in England or Ireland and sent directly and entirely to America as merchandise and not distributed in England. As you know Machins products have been found in England and no one has opined that they were of English origin. .

You asked when Vlack first published his first photographs of Machins coinage. I have such a single letter size positive photographic sheet prepared by him and I know one of my coins was imaged there and my name or initials mentioned next to it. It would take me awhile to find it but I think I can but I do not know if it will have a date or if there are accompanying papers. Ask anything else you may think I can be of help with. Eric

Hi Eric, Okay you have alliterated me with the Ringo Rat Roger!! <g> I was trying to think of a clever play on words in return, like the Noble Numismatist Newman, but it sort of lacks in originality!! In any case, I agree with you concerning the idea that a group of coins only found in America COULD have been minted in Britain and brought over for exclusive use in America. (I am not adamant, like Byron, in regard to the 1785s) Since the Ringo Rats have only been found in America, I certainly cannot rule out a British origin, though I still consider the possibility exists that they were minted here. Though no specific mint has been identified, we do know many illegal counterfeiting operations were in effect in the 1700's. Of course the 1777 date of the Ringo Rats in no way indicates that they were actually minted in 1777. I have a slight fear that they could have been minted in the 1800s' like the Blacksmiths. It would be helpful if we could relate this coin to others via die linkage but such does not exist at this time. In regard to any further help, I have attached the image of your coin which I used to make the plate images. I am not sure if this will help your curator find the coin easier but if he does the weight, diameter and axis data would be helpful.

In regard to the Machin's question, that was actually from Roger Siboni. Too many Rogers on the blog!! The answer was that Bob Vlack had a set of plates back in 1964 as his first set. Thank you anyway.

BTW just to embarrass you, I will indicate I bought the silver Rittenhouse medal of you as well as the ANS medal!!

My Best, Roger

Hello all, You each have the special privilege of owning one of the few Ringo Rat counterfeit halfpence. I have attached the draft of a paper I will be submitting once I have all the info and have tracked down a few other leads. In any case I would ask you to look over the paper in general but more importantly, please look at that section which shows your coin. ANYTHING else that you can add about your coin would be valuable, especially if you can indicate in more detail exactly when and how you got it. In any case, I look forward to your comments and thank you for being so generous in sharing your coins!!! Roger

Gentlemen, Bob Bowser was kind enough to point out a major ewrror in the Ringo Rat paper concernig the fact that there are are three units in the ordinal and not two. Because of this I have revised the paper and added all the info that everyone has supplied. I use the last name only under the photo of your coin but use your full name in the acknowledgement. If you would like your middle initial with your full name, please supply for thise that I have not included. I have two other leads to firm up having to do with a possible additional coin before the paper can be considered for publiucation. Thank you all. Roger

Hello all, I have attached the final version of the Ringo Rat paper which I plan to send to C4 Newsletter. However, before sending I thought I would give everyone one last look to correct any glaring errors about your coin specifically or about the

topic in general. It is amazing how I can read over mistakes repeatedly and not catch them. Your eyes would be appreciated. This was a fun paper to write and the one other possible specimen in ANS turned out to be a blind alley. You all have a very special coin!! Roger

**HAPPY BIRTHDAY -** BELATED!! i HOPE YOU HAD A WONDERFUL BIRTHDAY. 101!!! Whow!! Hope all is well and that you have many projects going. Another paper will be coming out in CNL on the Rubber Lady Family of counterfeit halfpence (AKA Clem Head) that includes one of your coins. Thr Ringo Rat paper was in the last C4 Newsletter and includes a photo of your Ringo Rat coin. I need to come visit sometime to make data measurement on your counterfeits!!! Hope your have a great Memorial Day weekend!! Roger

Good Morning Eric!! I wanted you to be the first to know that in yesterdays auction I won the 12-W Virginian from Craig's holdings. If you remember the 12-W was elusive and we could not track down where you got your photograph of the coin for your paper. You did supply me with a photo that showed traces of a fingerprint on the obverse. Craig's coin had the same fingerprint so it is the same coin!! As far as I can tell, it is the only 12-W known so far. I plan to do a short fun paper on being a detective and using fingerprinting to uncover the pedigree of a coin!! The coin was originally in the Picker collection. I hope all is well!! Roger

Hello Eric, I have written up a short report on the 12-W Virginian that I recently bought from the Ted Craige holdings. I would like to get your permission to use the image I took from the negative you sent me and the one in your article - Newman, E. P., Additions to Coinage for Colonial Virginia, Museum Notes X, The American Numismatic Society, 1962, pp. 137-143, with plates XXVIII - XXIX.

**Thank you for your support and help. Roger**

Hello Eric, I have attached the article which I wish to publish. It is a simple paper but I do use your images in it (both from your plate and one developed from your negative). Can I get permission to use them? Thank you. Roger

Hi Roger:  
We are glad for you to use our Virginia coinage images you wish to include in your writing. We do wish to receive a hard copy of your writing for our file.

Our best to you.

Hello Eric, Happy Birthday!! Probably if you are like me you don't want to be reminded but you know you are going to get an outpouring of congratulations!! Just to bring you up to date the 12-W Virginian you had in your monograph and the one I borrowed the photos from you is now mine. It was a Picker coin that was in a Stack's auction. So far it is the only one known!! Keep up the great numismatic work. I saw that you went to see a token press that is in operation. My very best, Roger

Hello Eric, Once again it is time of the year for your birthday happy wishes!! In elementary school we had to endure a spank for every year. I think this custom has hopefully passed for you!! My very best to you!!  
Roger Moore MD
